

Vasiliy Batmaev

Objective:

Quantum physicist and Python developer.

Experience:

Developed a privacy-oriented dating service for queer students, leveraging the Telegram Messenger API.
Conducted UX-research for it.

Worked for Telecommunications Research Center at MIPT.
Created a library to control the robotic platform.

Education:

Bachelor of Moscow Institute of Physics and Technology (2022),
which is #43 in the QS Physics & Astronomy world ranking.

GPA: 4.98 / 5, ranked 14th out of ~1000

The thesis was devoted to solving the traveling salesman problem
on a quantum computer.

Now, I'm a master's student in Scientific Software.

Coding skills:

Learned C, C++, Julia, Wolfram Mathematica, Python, and JavaScript.

Completed online courses on Deep Learning, Haskell,
Algorithms and Data Structures.

Also:

Upper-Intermediate proficiency in English.

Have experience with Affinity Designer, LaTeX, Docker, git, SQL.

1st place in the Russian Olympiad "Yandex-Professional"
in quantum technologies, and 3rd place in innovative healthcare.
