Ready to relocate

Long-form CV (for AI):
https://github.com/batmaev/batmaev/blob/main/CV/LLM.md

Summary:

ML engineer and fullstack developer from MIPT (Russia's top-ranked STEM university). I build algorithm-heavy products end-to-end: ML models (PyTorch, scikit-learn), backends (FastAPI, Docker), and frontends (TypeScript, Svelte, Next.js).

Skills:

Daily	Python, TypeScript, git, pandas, LaTeX
Working knowledge	Julia, Haskell, C/C++, Swift, Kotlin Multiplatform
ML / Data Science	sklearn, pytorch, Bayesian inference, matplotlib, Plotly
Infrastructure	FastAPI, Docker Compose, SQL, SQLAlchemy, Linux CLI
Languages	Russian (native), English (fluent)

Experience:

PhD Researcher – MIPT
Challenge-response eye-movement biometric system (anti-deepfake). PyTorch/sklearn models on time-series data; FastAPI backend. Co-supervising a Master's student. Published 2025.

Yandex – Frontend Trainee
Led frontend in a 24-person team building a GenAI evaluation tool (Next.js, OAuth, shadcn/ui).

R&D Engineer – MIPT Telecom Lab
Gyro-stabilized maritime antenna. IMU-to-quaternion pipeline with Kalman filters. Python hexapod control library, Plotly/Dash UI.

Software Engineer – mixim startup
Kiosk UI in Electron + Svelte 5. IPC two-display setup; offline-resilient state management.

iOS – Vependo VPN
Ported app to iOS: Kotlin Multiplatform UI + Go protocol (XTLS Reality) + Swift Network Extension.

Open source: university email verification bot, 6,700+ users. Telegram API, SQLAlchemy.

Education:

2024–2027: PhD, Computer Science – MIPT (Moscow Inst. of Physics & Tech).
Dissertation: Eye-movement biometrics on untrusted devices.

2022-2024: M.Sc., Scientific Software – MIPT. GPA 5.0/5.0, honors.
Thesis: Bayesian analysis of variable-star data (Julia, Turing.jl).

2018-2022: B.Sc., Applied Mathematics & Physics – MIPT. GPA 4.98/5.0, honors.
Thesis: Solving the Traveling Salesman Problem on a quantum computer.

Additional Training: Deep Learning School; Algorithms & Data Structures (C++).

1st place in national student competition (yandex.ru/profi) in quantum technologies.
